

TECHNICAL SKILLS

Languages: JavaScript (ES2022+), TypeScript, Java, Python(ai)
Frontend: React.js, Next.js, Redux, HTML5, CSS3, TailwindCSS, Material-UI
Backend: Node.js, Express.js, RESTful APIs, GraphQL, WebSockets, JWT, OAuth 2.0, RBAC
Databases: PostgreSQL, MongoDB, MySQL, Redis (TTL, cache-aside)
CloudDevOps: AWS (EC2, S3, Lambda), Docker, Kubernetes, CI/CD, Nginx, Azure, Git
SystemDesign: REST API design, Redis caching, DB indexing & query optimisation, real-time systems (WebSockets/SSE), microservices, auth & authZ patterns

EXPERIENCE - 8+ MONTHS AS FULLSTACK DEVELOPER

Anvelos Bengaluru, India
Software Developer Intern Dec 2025 – Present

- Developing full-stack features with **React**, **Node.js**, **REST APIs**, and **CI/CD pipelines** in an Agile team; contributing to backend design, frontend components, and cloud deployments.

Kroolo — AI-Powered Productivity SaaS Bengaluru, India
Full-Stack Developer Intern Jul 2025 – Nov 2025

- Shipped AI-integrated features using **Next.js**, **Node.js**, **Express**, **PostgreSQL**; maintained **97.8% uptime** across 5,000+ users; cut API latency **40%** via **Redis caching** and N+1 query fixes.
- Delivered **real-time WebSocket dashboards** with SSR (+35% engagement); secured APIs with **JWT + RBAC**; deployed on **AWS EC2/S3** using **Docker** and automated **CI/CD**.

PROJECTS

PoliGap — AI-Powered Policy Compliance & Governance Platform [Live · GitHub]
Next.js, Node.js, PostgreSQL, LangChain, OpenAI API, Redis, JWT

- Built an **AI full-stack web app** with an **LLM agent pipeline** (LangChain + OpenAI API) that semantically analyses enterprise policy documents against **GDPR**, **HIPAA**, and **SOX** rules, generating structured compliance gap reports in **under 30 seconds** for 1,000+ beta users.
- Engineered a **Node.js + PostgreSQL** backend with **Redis caching** (write-through + TTL), achieving **40% throughput gain** and **30% latency reduction**; delivered a **Next.js SSR** dashboard with live scoring, policy diffing, and audit trails secured via **JWT + RBAC**.

AEGIS — AI Cybercrime Interdiction & Real-Time Mobile Platform [GitHub]
React Native, TypeScript, Expo, Node.js, SQLite, Aadhaar e-KYC, NPCI APIs

- Architected a **full-stack AI mobile app** (React Native + TypeScript + Node.js) using **geospatial ML hotspot modelling** on live transaction data to predict fraud vectors within **90 minutes**; integrated an **AI-driven AR navigation layer** (Expo Camera + sensor fusion) for real-time field-officer guidance.
- Built a **REST API + NPCI integration** for a 2 km UPI digital cordon, **Aadhaar e-KYC + biometric auth**, DPDP-Act-compliant evidence capture, and **offline-first SQLite caching** with background sync for zero-connectivity deployments.

ZeroHack — AI-Integrated Network Threat Detection System [GitHub]
TypeScript, React, Node.js, Python, LangChain, Solidity, PostgreSQL, Docker

- Built a **full-stack AI security platform** — **React** dashboard, **Node.js REST API**, and **Python ML service** — performing **real-time network packet analysis**, protocol anomaly detection, and multi-vector threat scoring; added an **LLM layer** (LangChain) to translate ML scores into human-readable incident summaries.
- Deployed a **Solidity smart contract** audit trail for tamper-proof threat logging; containerised all services with **Docker** and automated testing + deployment via **GitHub Actions CI/CD**.

EDUCATION & ACHIEVEMENTS

Cambridge Institute of Technology, NC
B.E. Computer Science Engineering
CGPA: 8.4 / 10.0 | Expected 2026

SIH Runner-Up — Top 0.004% of 52K+ teams
GSSoC 2024 — 15+ PRs merged, Campus Ambassador
Coding Club Lead — 3 workshops, 100+ peers mentored
Certs: Full-Stack (Internshala) · Figma UX · Postman · Git
