PROFESSIONAL SUMMARY

Software Developer with 1+ year of full-stack experience in React, Node.js, and cloud technologies. Proficient in building scalable web applications, RESTful APIs, and AI-integrated solutions. Proven track record through hackathon wins and open-source contributions.

WORK EXPERIENCE

Kroolo

Full-Stack Developer Intern

Jul 2025 – Oct 2025

Bengaluru, India

- Built scalable AI-integrated web apps with **Next.js, React, Node.js, Express, PostgreSQL**, serving 5K+ users at **97.8% uptime**
- Designed secure **RESTful APIs** with **JWT-RBAC**; cut latency by **40%** via **Redis caching** and query optimization
- Implemented **real-time dashboards** using **WebSockets** and **SSR**, lifting engagement by **35%**
- Deployed on **AWS** with **Docker** and **CI/CD pipelines**; collaborated in **Agile/Scrum** using **Git**

KEY PROJECTS

PoliGap — AI Policy Governance Tool

MERN, PostgreSQL, LangChain, OpenAI API, Redis

- Built an **AI compliance engine** that auto-scores policies against **GDPR, HIPAA, SOX** using **LLM agents**, delivering gap analysis in **<30s**
- Engineered secure **RESTful APIs** with **JWT-RBAC** and optimized **PostgreSQL** queries, improving back-end throughput by **40%**
- Developed a responsive **Next.js dashboard** with real-time scoring, audit trails, and policy diff tracking for **1K+** users
- Integrated **Redis caching** and rate limiting to reduce latency by **30%** and ensure enterprise-grade reliability

ZeroHack — AI Cyber Threat Simulation Suite

React, Flask, Python, Docker, Elasticsearch, Kibana

- Designed a **threat emulation platform** using **Atomic Red Team** to simulate adversary TTPs and validate security controls at scale
- Built **containerized Flask APIs** to orchestrate automated attack simulations, accelerating vulnerability detection by **45%**
- Implemented real-time monitoring with **Elasticsearch + Kibana** dashboards for live threat visualization and incident response
- Deployed the platform using **Docker** and modular workflows, enabling security teams to test defenses without manual intervention

EDUCATION

Cambridge Institute of Technology, North Campus

B.E. in Computer Science

Bengaluru, Karnataka

CGPA: 8.4 / 10.0

Relevant Coursework: Data Structures & Algorithms, DBMS, Software Engineering, Web Technologies, Operating Systems, Computer Networks

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, Solidity

Frontend: React.js, Next.js, HTML5, CSS3, TailwindCSS, Material-UI, Redux

Backend: Node.js, Express.js, RESTful APIs, GraphQL, JWT, OAuth 2.0, WebSockets

Databases: PostgreSQL, MongoDB, MySQL, Elasticsearch

DevOps & Cloud: Git, Docker, Kubernetes, AWS (EC2, S3, Lambda), Azure, CI/CD, Nginx

AI & Blockchain: LangChain, OpenAI API, Web3.js, Smart Contracts, IPFS

CERTIFICATIONS

Full-Stack Web Development – Internshala Dec 2023

UI/UX Design with Figma – GrowthSchool Jun 2024

Postman API Fundamentals – Postman Aug 2023

Git & GitHub Essentials – Coursera Sep 2024

ACHIEVEMENTS & LEADERSHIP

SIH Runner-Up (Top 0.004%) among 52K+ teams; built ML-powered PDF fuzzing tool in Python

GirlScript Summer of Code 2024: 15+ PRs, promoted to **Campus Ambassador**, mentored 50+ students

Led College Coding Club: ran 3+ workshops (DSA, full-stack, Git), mentored 100+ peers

50+ problems solved on LeetCode HackerRank; active on CodeChef Codeforces

Languages: English (Professional), Kannada (Native), Hindi (Intermediate)
